## Start Exam Preparation with CertsFire Amazon SCS-C01 Practice Questions:

CertsFire.com is one of the best platforms that have been helping the **[Amazon Exam Questions](#)** candidates for many years. Over this long time, period the countless Amazon Specialty SCS-C01 exam dumps aspirants have passed their dream Amazon SCS-C01 certification exam and they all got help from Amazon SCS-C01 practice questions and easily passed the certificate. You should not ignore the AWS Certified Security - Specialty SCS-C01 exam dumps and must add the Amazon Specialty SCS-C01 exam questions in your preparation. The Amazon SCS-C01 exam dumps are the

valid, updated, and real AWS Certified Security - Specialty SCS-C01 exam questions that will surely repeat in the upcoming Amazon SCS-C01 certification exam and you can easily pass the exam.

## **User-friendly and Compatible CertsFire Amazon SCS-C01 Practice Questions Formats:**

The **CertsFire** is committed to offering the simplest and high in demand way of Amazon Specialty SCS-C01 exam dumps preparation. For this purpose Amazon SCS-C01 exam experts have designed the AWS Certified Security - Specialty SCS-C01 practice questions in three easy-to-use and compatible formats. These easy-to-use Amazon SCS-C01 exam dumps will provide you with everything that you need to learn, prepare and pass the challenging Amazon Specialty SCS-C01 certification exam. The name of Amazon SCS-C01 exam questions formats is PDF dumps file, desktop practice test software, and web-based practice test software. All three Amazon SCS-C01 practice exam formats are designed to ace your AWS Certified Security - Specialty SCS-C01 certification exam preparation and enable you to pass the exam on the first attempt.

## **You're Investment with CertsFire Amazon SCS-C01 Exam Dumps are Secured:**

One of the best features of Amazon Specialty SCS-C01 exam dumps is that your investment is secured with us. The CertsFire has a firm belief in the performance of Amazon SCS-C01 exam questions and that's why we are offering a 100 percent Amazon SCS-C01 certification exam passing a money-back guarantee. So to earn the badge of AWS Certified Security - Specialty SCS-C01 certificate reenroll in the Amazon Specialty SCS-C01 exam and start preparation. Download the Amazon SCS-C01 practice questions instantly and start this journey. In rare cases, if you fail to pass the AWS Certified Security - Specialty SCS-C01 certification exam despite using our Amazon SCS-C01 exam dumps.

### Question No. 1

A company's security information events management (SIEM) tool receives new AWS CloudTrail logs from an Amazon S3 bucket that is configured to send all object created event notification to an Amazon SNS topic. An Amazon SQS queue is subscribed to this SNS topic. The company's SEM tool then ports this SQS queue for new messages using an IAM role and fetches new log events from the S3 bucket based on the SQS messages.

After a recent security review that resulted in restricted permissions, the SEM tool has stopped receiving new CloudTrail logs.

Which of the following are possible causes of this issue? (Select THREE)

- **A.** The SQS queue does not allow the SQS SendMessage action from the SNS topic
- **B.** The SNS topic does not allow the SNS Publish action from Amazon S3
- **C.** The SNS topic is not delivering raw messages to the SQS queue
- **D.** The S3 bucket policy does not allow CloudTrail to perform the PutObject action
- **E.** The IAM role used by the SEM tool does not have permission to subscribe to the SNS topic
- **F.** The IAM role used by the SEM tool does not allow the SQS DeleteMessage action.

**Answer:** A, D, F

### Question No. 2

A company has multiple departments. Each department has its own AWS account. All these accounts belong to the same organization in AWS Organizations.

A large .csv file is stored in an Amazon S3 bucket in the sales department's AWS account. The company wants to allow users from the other accounts to access the .csv file's content through the combination of AWS Glue and Amazon Athena.

a. However, the company does not want to allow users from the other accounts to access other files in the same folder.

Which solution will meet these requirements?

- **A.** Apply a user policy in the other accounts to allow AWS Glue and Athena to access the .csv file.
- **B.** Use S3 Select to restrict access to the .csv file. In AWS Glue Data Catalog, use S3 Select as the source of the AWS Glue database.
- **C.** Define an AWS Glue Data Catalog resource policy in AWS Glue to grant cross-account S3 object access to the .csv file.
- **D.** Grant AWS Glue access to Amazon S3 in a resource-based policy that specifies the organization as the principal.

**Answer:** A

### Question No. 3

A development team is attempting to encrypt and decode a secure string parameter from the AWS Systems Manager Parameter Store using an AWS Key Management Service (AWS KMS) CMK. However, each attempt results in an error message being sent to the development team.

Which CMK-related problems possibly account for the error? (Select two.)

- **A.** The CMK is used in the attempt does not exist.
- **B.** The CMK is used in the attempt needs to be rotated.
- **C.** The CMK is used in the attempt is using the CMKs key ID instead of the CMK ARN.
- **D.** The CMK is used in the attempt is not enabled.
- **E.** The CMK is used in the attempt is using an alias.

**Answer:** A, D

#### **Question No. 4**

A business stores website images in an Amazon S3 bucket. The firm serves the photos to end users through Amazon CloudFront. The firm learned lately that the photographs are being accessible from nations in which it does not have a distribution license.

Which steps should the business take to safeguard the photographs and restrict their distribution? (Select two.)

- **A.** Update the S3 bucket policy to restrict access to a CloudFront origin access identity (OAI).
- **B.** Update the website DNS record to use an Amazon Route 53 geolocation record deny list of countries where the company lacks a license.
- **C.** Add a CloudFront geo restriction deny list of countries where the company lacks a license.
- **D.** Update the S3 bucket policy with a deny list of countries where the company lacks a license.
- **E.** Enable the Restrict Viewer Access option in CloudFront to create a deny list of countries where the company lacks a license.

**Answer:** A, C

#### **Question No. 5**

A business requires a forensic logging solution for hundreds of Docker-based apps running on Amazon EC2. The solution must analyze logs in real time, provide message replay, and persist logs.

Which Amazon Web Offerings (AWS) services should be employed to satisfy these requirements? (Select two.)

- **A.** Amazon Athena
- **B.** Amazon Kinesis
- **C.** Amazon SQS
- **D.** Amazon Elasticsearch
- **E.** Amazon EMR

**Answer:** B, D
